ONE PARK

Message from the Corner Office

Welcome to September!

Taking a look at our August 2021 incident reports vs August 2020, our utility strikes are up dramatically and our property/equipment damages are consistent. What does this mean? It means that the heat may have played a contributing role in us assuming we are cleared to dig in areas which we were not. You have taken a lot of pride in reducing our incidents compared to where we once were, and believe me, we've seen incredible improvements and all of it is appreciated.

Aug 1, 2020 - Aug 31, 2020

Utility Hits - 2

Property/Equipment Damage

Category 2 (Cosmetic/Possible Repair)

1

Category 3 (Substantial Damage)

3

Category 4 (Major Damage)

1

Aug 1, 2021 - Aug 31, 2021

Utility Hits - 6

Property/Equipment Damage

Category 2 (Cosmetic/Possible Repair)

0

Category 3 (Substantial Damage)

3

Category 4 (Major Damage)

1

None of the above statistics can account for the hundreds, if not in the thousands, of utilities that we crossed over successfully. Keep up the great work and don't allow complacency to set in while finishing strong.

Sincerely,

Jeff Slusser
Safety and Health

**Project Profile:
Carver Elementary School
Independent School District 622**

Project Overview:

Park Construction was awarded the Site work, Utilities, Asphalt Paving, and Building Demolition package for the Carver Elementary School additions and renovations project in Maplewood, MN. This project included the demolition of a 24,000 SF existing wing of an elementary school and the construction of two new additions, three new parking lots, a bus/parent drop-off loop, and a new playground area.

Work Scope: Sitework/Earthwork, Utilities, Asphalt Paving, Building Demolition, Site Concrete, Landscaping, and Fencing.

Project Contract Amount: \$2,930,000.00

Duration: Spring of 2020 – Spring of 2022

Estimated Quantities & Project Highlights:

- Earthwork operations moved roughly 40,000 CY of material on site.
- Park installed 1,200 LF of 60" perforated corrugated metal pipe that serves as the underground stormwater infiltration system to assist on site water management.
- Park utility crews installed:
 - 412 LF of sanitary sewer
 - 700 LF of water services
 - 4,400 LF of storm sewer

- Excavation of over 2,200 LF of frost footings and 85 structural pads.
- This project includes a Biofiltration detention basin filled with engineered soils to help filtrate clean water into the ground.
- The basin contains 6 different types of trees and shrubs equaling 212 total plantings.

Employee Spotlight!

Tim Moe - Heavy Civil Superintendent

Why Park Construction?

I grew up with Park and have been a part of this company my entire life. They have taught me a lot and I started very young. As a senior in high school, all I wanted to do was work. Wanted it so much that I couldn't attend any high school grad parties because I was out making money!

What is your favorite thing about your job? What excites you the most?

Watching the jobs start from a set of blueprints to where it's designed to be. Seeing some of the new design applications that are being put into jobs are very interesting. I really enjoy meeting new employees, mentor them, and watching them excel in their careers.

Mentoring and teaching new people is very exciting and it also helps me learn as well. It's never boring and the learning never stops.

What has been your biggest achievement/success?

Getting these jobs completed!! The deadlines on some of these jobs are so tight and getting the job done on time, under budget, and without injury and/or property damage. Also, I like to complete these jobs with very little items on the punch list. This means we finished the job with high quality and finishing strong.

What is the best career lesson learned so far?

Learning from failures is the best lessons learned and I've failed a lot. I've also learned a lot from not taking easy jobs, meeting others from different regions of this country, and finding new ways to approach and execute jobs more efficiently. Tougher jobs and raising my hand when they are looking for someone to go to an uncomfortable job. Never turning down a job/task that was asked of me has allowed me to really broaden my own level of experience and value.

Why do you work safe?

Family is always first... I love spending time with my granddaughters. I'd like to think that I take the time teaching safety to next generation and not worrying about the time it takes to be safe. Getting the job done safely has always been a source of pride for me.

What do you do when you're not working?

Spend as much time as possible with the grand kids and family. I love snowmobiling, hunting, fishing, ATV'ing, cutting hay, and the smell of fresh dirt being turned over, regardless of if it's turned from a dozer or tractor. Anything outdoors, I love.

As a reminder, please help Park in delivering as many school supplies to the SLP school district as possible. Drop off locations are at the shop and corporate office.

SCHOOL SUPPLY DRIVE

BENEFITING SCHOOL STUDENTS WHO NEED THEM

COLLECTION UNTIL:
SEPT. 30TH

DROP-OFF LOCATION:
PARK CONSTRUCTION
OFFICE & SHOP ENTRY

WHAT WE NEED

- SHARPENED PENCILS - 24
- DRY ERASE MARKERS - 4
- CRAYONS 24PK - 1
- GLUE STICKS - 4
- WASHABLE MARKERS 10CT - 4
- NOTEBOOK WIDE LINED - 2
- FOLDERS - 2
- COLORED PENCILS - 1
- COMPOSITION NOTEBOOK - 2
